

Poseidon info letter no. 5 of 19-12-2013
Distributed to project partners and business partners

Dear project partners.

Hereby this year's last status update from the Poseidon project containing a collection of everything that has happen since the last time as well as what will happen first in the new year.

Steering group meeting

This year's last steering group meeting took place Wednesday the 11 and Thursday the 12 of December in beautiful surroundings at Hotel Niels Juel.

The steering group at the meeting. We get a new member in Denmark, Nichlas Mørk, because Stine goes on maternity leave in the spring 2014. From the left: Morten Ellehauge, Nichlas Mørk, Christian Lange, Wiebke Lange, Signe Odsbøll, Michael Tobias and Andreas Nollenberg

We had a visit from the project's evaluator Søren Kristensen, who base on a previous questionnaire took the pulse on the project, and what works well and what needs continues development in the coming year. After this the steering group had a good talk about next year's main focus, planning of various meetings and student exchanges, as well as a longer talk about a conference in 2014.

The local company Coverganda, from Køge, also dropped by to present what they can assist with in connection with products and merchandise, as well as the longer-term help when it comes to movies and photos. Thursday went with talk about budget, revision and annual report. There will be revision meeting on the Danish side Tuesday the 14 of January 2014. We were also able to get some more details I connection with the conference in 2014, read more about this later in the info letter.

Educational day

In work package 2 we mention that we have to develop a competence board for the young people who participate in the project. This, or something similar, they would like to implement at Fremtidslinjen. Therefore Preben Jensen from Korsør Production School visited Fremtidslinjen Monday the 16 of December to inform more about their work and the development of both boards and certificate. This resulted in a good talk about how it might be organized for the students at Fremtidslinjen and we will at the first meeting in the new year have a longer talk about how it realistically should be designed. Our first meeting in 2014 is a working group meeting and it takes place in Køge at the 12-14 of February.

Conference 2014

The Poseidon project has planned a Kick Off conference, a mid-term conference and an end conference. Thursday in week 10 or 11 the mid-term conference will take place in Køge and as soon as all the practical work is settled, you will receive an invitation. We have talked about inviting employees from WienWorks and Atempo whom we visited at the conference in Vienna this fall. The students from Koppelsberg will also be joining as the student exchange is to take place in this week.

We wish all of our business partners a Merry Christmas and a Happy New Year.

Are there any questions or comments you are welcome to make contact.

Kind regards

Mai K. L. Greve
